

PAMBANSANG MUSEO NG PILIPINAS
NATIONAL MUSEUM OF THE PHILIPPINES
BID BULLETIN
NO. 2023-01

Project Title : **Replacement of Defective Parts of Emergency Electric Power Supply System at Central National Museum Buildings**

Item No. 1 : Bidder's Inquiries

Inquiry	Response
1. Single Largest Completed Contract - Is it possible to use a completed project with a scope of repair? In this project it includes replacement of major and minor parts for the generator set.	Similar projects pertain to Replacement of Generator Set Parts. Repair of generator set project which includes replacement of major and minor parts is considered as similar projects.
2. Delivery Schedule 90 days - This is in regards with PT Pump Assembly for the 1375KVA Cummins. I would like to inform you that I checked with our principal supplier (Cummins Philippines) and I was informed by them that the said original unit is made to order. The item is not readily available in the Philippine market and we need to order it from Cummins USA.	Based on our market study, 60 calendar days duration is enough to complete the project. In case there were delays that were beyond the control of the contractor, we can issue a time extension or suspension to compensate the time consumed.
3. During the meeting, we were informed that we can supply a replacement brand as an alternative for the PT Pump. Kindly confirm this statement, so that we could avoid disqualification if ever we offer a replacement or different brand.	The contractor may use replacement brands as long as it is compatible with our existing equipment.

Done this 5th day of December 2023.
